

Sprint 1: Foundation & First Playable

Goal: Build a minimal prototype to test core mechanics and establish workflows.

Deliverables:

1. Git & Trello Setup

- Repository with basic structure and .gitignore
- Trello board with columns: Backlog, To Do, In Progress, Review, Done or similar.
- All Sprint 1 tasks created as cards

2. First Playable Build

- Player can move in a simple test room
- One core game mechanic is functional (e.g., pick up/place object)
- Some simple objectives can be completed

3. Initial GDD (1 page max)

- Core Concept & Gameplay Loop
- Controls & Primary Interaction
- Art Style Reference

Definition of Done: All code merged to main, build runs without errors, prototype is playable.
